

Past projects in Malaysia

BUILDING CONSTRUCTION

5 Storey AIMST faculty in Sg. Petani, Kedah Malaysia

A total of 10 Scanclimbers used at the site during the peak, ranging from 15m to 30m in height.

60M JPN low-cost in Setapak

Scanclimbers were used for plastering and painting work for a total of six blocks of JPN low cost apartments.

5-7 units were used for one apartment building at the time

10 Storey Human Resource Ministry in Putrajaya

Scanclimbers being constructed in a T-shape to lift ready-made partition wall unit weighting 70 kg each in sizes of 4ft x 10ft into the building through the windows

The Scanclimber have been well tested and used at various reputable projects in Malaysia namely in KLCC, KLIA, various Oil & Gas sector projects like (OGP, Petronas, Optimal and Malacca refinery, check more from our references

Past projects in Malaysia

OIL & GAS INDUSTRY

Optimal Chemicals (M) Sdn Bhd Main Flare Tower in Kertih, Terengganu

Transporting workers, tools, and all of the necessary materials & tools up and down, when the flare top was replaced.

Project completion 2006 (February-March)

Petronas Gas Flare Tower in Kertih, Terengganu

SC1300 unit was used for transporting workers, tools, and all of the necessary materials up and down, when the flare top was replaced by a new one with the help of a 500-ton crane. The height of the tower is 114 m.

A special anchoring system was created to suite the tower and design calculation for the wind force and stability of calculations and design.

Raw Water Tank in Kuantan Pahang

SC1300 model was used inside and outside the tank to carry out sand blasting and the painting of the tank in CUF site.

Check more projects from our references.

The Scanclimber Mast Climbing Work Platform helps cut the cost of using expensive modular scaffolding. The Scanclimber is relatively quicker to erect and dismantle than scaffolding. Materials and equipment can be lifted at the same time as workers. It provides a safe platform for workers to work on and expedite work, such as for maintenance shut downs

Past projects in Singapore

BUILDING CONSTRUCTION

Singapore Brick Façade Project

Seven (7) SC4000 units, height up to 100m and platform length up to 12.5m, were used during the maintenance of brick façade in Singapore.

Balcony installation in Singapore

Total of 16 SCANCLIMBER SC4000 models with special 9 ft extensions were used during the balcony installation to cover the balcony row from both sides.

Balcony Installation in Singapore

The Singapore "HDB" (Housing Development Board) building projects, used SCANCLIMBERS for installation of new balconies and upgrading facades of old buildings.

The use of SCANCLIMBER SC4000 mast climbing platforms up to a height of 75 m in these projects not only saves cost and time but also increases the work safety at great heights.

Scan-Rent Sdn Bhd
